Designed for your profit

## MAXXTURN 65

Universal turning center for complete machining of bar stock and chuck work

## MAXXTURN 65-1000

The MAXXTURN 65 is a new development in the MAXXTURN range. Its smart modular design means it perfectly meets specific customer requirements.
Two identical high-performance spindles set the basis for unlimited machining. A turret on the cross slide with optional Y -axis to ensure greater productivity. Each position on the tool turret can accommodate both stationary and driven milling/drilling heads.

| Integrated, water-cooled spindle motor <br> Spindle nose A2-6 (A2-8) <br> - High drive power 29 (37) kW <br> - High torque 250 (360) Nm <br> Large speed range 0-5000 (4000 / 3500) <br> Bar capacity diameter $65(76,2 / 95) \mathrm{mm}$ |

2. TOOL SYSTEM

12-station tool turre

- VDI30 (VD140) quick-change system
. 12 driven tool stations
- Servo-controllec

Rigid tapping
Polygonal turning, etc.
New with BMT-turret and direct drive
(3) Y-AXIS
-Travel $+/-50 \mathrm{~mm}$
Stable, compact construction

- Largely spaced guide ways
$\square$ Wedge-style design
(4) WORK AREA
- Large spindle distance 1050 mm
- Optimum accessibility

Stainless steel col

- Stainless steel covers and linings

Machine with optional equipment
Integrated, water-cooled spincle motor

Spindle nose A2-6 (A2-8)
High torque 250 (360) Nm
Large speed range 0-5000 (4000/3500) rpm
Bar capacity diameter $65(76,2 / 95) \mathrm{mn}$
(5) CONTROL UNIT

Ergonomically arranged on the right from
the working area

- Swiveling
- Heightadjustable
- SINUMERIK 840D sl / $22^{\prime \prime}$ or FANUC 31iB / $15^{\prime \prime}$

Conversational programming (ShopTurn / Manual
Guide i)
-

6 COUNTER SPINDLE
A2-6 (A2-8) spindle nose
Integrated, water-cooled spindle motor

- High drive power $29 \mathrm{k} /$
- Large speed range $0-5000$ (4000) rpm
- Incl. coolant-fed parts ejector

Optional with $\varnothing 65$ (75) mm through hole for shaft unloading
7) CHIP CONVEYOR

Hinged type oonveyor belt
Ejection height 1200 mm

- Integrated coolant tank 350
- Turret pump 14 bar
- Flushing pumps $2 \times 3.7$ bar
${ }^{8}$ AUTOMATIC WORK PIECE PICK UP DEVICE
Optional arranged on the right in the
working area
Protected against chips and coolants
- Universally applicable
$\square$ Including along-integrated prefabricated
part buffering belt

$\sum_{\substack{\text { Distributor body } \\ \text { (Steel) }}}$

Tool turret. Fast 12-station servo turret with very short switching times for standardized VDI30 or VDI40 tools. All stations can hold driven tools for drilling, The operator is able to control the indexing speed with the override switch at any time.

BMT-turret. For economical production of complex turned/milled parts with mainly millilg share, thered is optional the BMT-turret with water
cooled direct drive. With max. 12000 rom 30 Nm and 10 kW . his turret offers optimal prerequisites for the complete machining.

Finished part conveyor belt. On the conveyor belt within the machine casing, arranged lengthwise, with a storage surface of $1400 \times 180 \mathrm{~mm}$, the work pieces are put down damage free.

Tailstock. For shaft-type application, the MAXXTURN 65 offers two tailstock for manually loaded machines and on the other hand a NC-tailstock for fully automatic loaded machines. With the advantage of very short idle times.

## Highlights

- 2 high performance and water cooled spindle motors
12-station turret with VDI 30 / 40 quick-change system
- Optional with BMT-turret and direct drive up to 12000 rpm
Y-axis for processing of complex turned/milled parts
- Bar stock feed up up to $\varnothing 95 \mathrm{~mm}$
- Optimum chip flow and user-friendly work area
- Sinumerik 840D sl or Fanuc 31i for
high-performance drive and controls
- Made in the Heart of Europe
 Control. The Sinumerik 840D sl with operate user interface resp. Fanuc
31i with Manual Guide i is ergonomically arranged on the right from the working area and can be swiveled $80^{\circ}$. Dependiing on customer require-
ments a $15^{\text {c }}$ colour monitor instead of a $10,4{ }^{4}$ monitor is available. The bottom is a 230 Volt socket, which can be used for any electrical device.

Workspace Maxxturn 65-1000 with VDI30

Workspace Maxxturn 65-1000 with VDI40

Workspace Maxxturn 65-1000 with BMT55

Machine layout Maxxturn 65-1000

Performance and torque Maxxturn 65 main and counter spindle ø 65/76,2 mm

Performance and torque Tool turret driven tools VDI 30/40

Performance and torque Maxxturn 65 main spindle ø 95 mm

Performance and torque Tool turret driven tools BMT55P

## The EMCO gantry loader. Individual process optimization.

## ( GANTRY LOADER

## Advantages

■ Fully automatic loading and unloading of the workpieces

- Multi-channel Sinumerik control incl. user cycles
- Seamless interplay between the machine tool and the loading device

Varied possibilities of customer-specific adaptation

- Possibility of integration of measuring station, signing station, cleaning station, etc $\square$ Short spare time due to a load

## Automatic Return on Investment

Workpiece magazine
Blank-specific pallet attachments enable oriented loading of blanks into the machine and increase the parts stock for unmanned production. Changeover times are reduced or eliminated thanks to the perfect adjustment to the customer's parts.

EMCO Stangenlader

EMCO short bar loader. In view of the ever-increasing pressure on
floorspace for machines. EMCO has developed the most compact都 short loader on the market: the EMCO SL1200.

EMCO Top Load 10-65. 3-metres of bar material may be loaded into
the machine in a fully automated way. Multi-Level material supports enable unmanned operation for an even longer period of time.

## EmICINNECT

YOUR GUIDE IN TECHNOLOGY

## Your "Control Center" for the entire production flow

lear and compact processing of all relevant machine and NC data depending on the configuration of the machine (number of tool systems, spindles, ...) and the active operating mode (JOG, MDA, AUTO). Know at a glance whether everything is OK or whether the machine operator will be required to interac

emcoNNECT's hardware basis is a 22 industrial touch control panel combined with an industrial PC (IPC).

## Highlights

- Direct interaction between EMCO Apps and the control
- Intuitive user interface optimized for touch control
$\square$ Range of available applications is continuously being expanded
$\square$ Customised and project-specific applications
- Optimized for the EMCO machine range
- emcoNNECT allows for easy and quick configuration and updating

MACHINE DATA - All Data related to Productivity at a Glance current production status and OEE (Overall Equipment Effectiveness) values full screen or sidebar.

SINUMERIK - the Control and the Machine's Centerpiece
Thanks to the App Launcher operators may switch between th mooNNECT Apps and the control at any time. All it takes to
o so is a click on the emcoNNECT logo. To improve the work processes on the machine the control can, as shown in the picture, be operated in full screen mode or in interaction with practical apps (sidebar)

DOCUMENTS - A Digital and
Expandable Document Collection Customised to Suit Your Individual Needs to display PDF documents such as machine documentations, programming instructions, process descriptions. Including favourites management - full screen or sidebar

## Virtual workflow. <br> Real benefits.

## Quality Components

## Clamping cylinder / chuck

Hydraulically activated clamping cylinders and chucks guarantee the precise, safe clamping of work pieces. Programmable sensors are used for stroke monitoring. There is no need for time-consuming adjustments of contactless limit switches.

## Machine bases and slides

When matching components, we place great value on high stability, good damping characteristics, and a thermoneutral design. We achieve high stability through a shorter force flow, thermal stability through symmetry, and dampening through the materials and interfaces selected.

## Tool holder

Innovative, fully developed tool holder systems form the basis for cost-effective machining. High changeover accuracy and stability result in short setup and cycle times.

## Tool turret

Rapid-indexing turrets with adjustable swivel speeds and milling drives represent the current state of the art. The backlash-free milling drive is not only ideal for milling and drilling, but also for rigid tapping, hobbing, and polygonal turning.

## Headstocks

The design and manufacture of headstocks are two of EMCO's core competencies. During engineering, the focus is on precision, robustness, high rigidity, precise rotational characteristics, and a long service life.

## Ball screws and roller guides

Highly precise and generously dimensioned guide rails and ball screws with optimal pretensioning form the basis for the machining of precision parts

Coolant pumps
Low-maintenance immersion pumps for pressures of up to 25 bar and flow rates of up to $1500 \mathrm{I} / \mathrm{min}$ provide optimum conditions for machining and enable reliable chip transportation.

## Hydraulic systems

Compact dimensions, quiet operation, and high energy efficiency - just some of the advantages of the hydraulic assemblies used by EMCO. Monitored pressure switches prevent the need for time-consuming manual pressure adjustments.

## Chip conveyor

Slat band conveyors allow for flexible implementation and the safe removal of chips. A monitored overload clutch prevents damage from improper use.

## Minimum use of resources for maximum profit.

Designed for Efficiency

At EMCO, we take a consistent, responsible approach to the use of resources in machine tools in order to safeguard long-term investments. From the development of our machines through to their construction and manufacture, we place a strong focus on the sensible and sparing use of raw materials and energy. This enables us to achieve parallel savings in two areas:

1. Reduction in the basic power consumption of machine tools, e.g. assemblies are switched on and off as required and the installed connected loads are kept to a minimum.
2. Reduction in variable consumption: This can be seen in the lighter axes, energy recovery system, increased rate of good parts, and the shorter process chain enabled by complete machining.

Through these measures, which are constantly being refined and further optimized, EMCO truly demonstrates that its slogan of „Designed for your Profit" is not just an empty promise: EMCO products help save the environment and provide intelligent customer savings without compromising on quality and flexibility.

## [Regenerative drive system]

Kinetic energy is converted into electrical energy and fed back into the grid.
Savings of up to $10 \%$

## [Structurally optimized mechanics]

FEM analysis is used to optimize the relevant components in terms of their rigidity while simultaneously reducing their weight.
Savings of up to $10 \%$

## [Intelligent standby concepts]

Reduced consumption by automatically switching off ancillary units and machine space/screen illumination after a defined period of inactivity on the control panel. Savings of up to $50 \%$

## [Compact hydraulics unit with pressure accumulator]

Thanks to its accumulator charging system, the pump only runs when required. If the pressure accumulator is full, the pump switches over to closed loop circulation. Savings of up to $90 \%$

## [Highly efficient motors]

The use of energy-efficient motors (IE2) in the coolant preparation area guarantee highly cost-effective operation.
Savings of up to $10 \%$

## [Virtual machine]

Significant reduction in the setup and running-in times on the machine through the use of highly developed simulation and programming software.
Savings of up to $85 \%$

## [Roller guides]

Extremely low friction losses thanks to rolling friction. Highly dynamic performance with minimal lubricant consumption. Savings of up to $50 \%$

## [Synchronized chip conveyor]

Programmable interval times enable optimal use of the chip conveyor independently of of the machining process.
Savings of up to $95 \%$

## [Intelligent energy management]

Intuitive data entry screens for activating the individual energy-saving functions. Savings of up to 70\%
